

New WBS-5000P Beamforming Access Solution

5+1 Introductory Promotion

Extend your access network with Wavion's new 4.9-5.9 GHz omni-directional base station, for greater speeds and best ROI.

Best Performance at Best Price

Wavion is happy to announce the availability of WBS-5000P base station. Till end of Q3 2011, Wavion offers an introductory package - you buy five WBS-5000P base stations and get the additional sixth for free. The WBS-5000P is a carrier grade outdoor Wi-Fi base station, providing high quality of service at the lowest cost per coverage area. Grab this introductory promotion and move to Wavion's Beamforming Wi-Fi in 5 GHz.

Terms and Conditions

Who can enjoy the promotion?

Anyone in need for a 5 GHz network - end users, system integrators, distributors and partners.

When can I take advantage of this promotion?

This promotion runs from now until end of Q3 2011.

How many promotion packages can I order?

There is no limitation on the number of promotion packages per customer.

Valid for WBS-5000P base stations only, for every order of five units together we will ship six.

The New WBS-5000P Base Station

The new WBS-5000P* is an advanced omni-directional outdoor Wi-Fi base station, operating in the 4.9-5.9 GHz band. Based on an array of three radios and three high-gain antennas, the WBS-5000P leverages Wavion's unique spatially adaptive Beamforming technology to provide extended range and superior connectivity under both Line-of-Sight (LOS) and Non-LOS (NLOS) conditions. Moreover, interference handling mechanisms coupled with 10 and 20 MHz channel options provide the best performance in all environments.

* Out of the box 4.900-5.900 GHz, can be configured to 5.470-5.725 GHz and ETSI power
