

Wavion, SYSCOM and ESTELM Partner to Provide Traffic Video Surveillance to the City of Tlalnepantla, Mexico

Yoqne'am, Israel, April 12, 2011— Wavion™, a technology leader in metro and rural Wi-Fi with a new generation of Wi-Fi base stations, SYSCOM a distributor of telecom and video surveillance equipment in Mexico and ESTELM, a system integrator in Mexico, announced today the deployment of Wavion's Wi-Fi base stations for traffic video surveillance in the city of Tlalnepantla, Mexico.

The project covers 42 video surveillance cameras, installed in critical places around the city, each transmitting video rate of about 1 Mbps. The backhaul network is based on Wavion's WBS-5000 base stations, working in the 5 GHz band, in conjunction with Wi-Fi CPEs, attached to each camera. The links are as long as 5 km, carrying the video information to the city council, where the monitoring center is located.

"We have selected Wavion's Wi-Fi solution due to its robust and reliable performance and superior NLOS capability," said Manuel Serrano, ESTELM's CEO. "The city council is very pleased with the outcome. It has greatly improved the traffic monitoring and enabled more sophisticated control of the traffic flow in the city".

Wavion's carrier grade unique and powerful WBS-5000 spatially adaptive Beamforming base stations provide extended range, higher throughput and superior NLOS coverage. As a result, unlike conventional Wi-Fi equipment, they do not require costly high towers and can be easily installed on poles and yet provide very reliable and high quality links.

"Wavion is proud to partner with SYSCOM and ESTELM in this project in Mexico", said Daniel Dominguez, Wavion's VP Sales LATAM. "We are pleased that our superior coverage and reliability have significantly contributed to ESTELM success. It is yet another proof of the added value of our unique and powerful Beamforming technology to city-wide deployments."

About Wavion

Wavion Wireless Networks is a worldwide technology leader in outdoor Wi-Fi applications in metro and rural areas with deployments in more than 65 countries. The company's true digital Beamforming and Space Division multiple access (SDMA) technologies are the first and only to resolve the significant performance, penetration and profitability challenges facing large scale metro and rural deployments. Featuring Wavion Base Stations (WBS), in 2.4 GHz and 5 GHz unlicensed bands and in 700MHz licensed band, Wavion offers end-to-end solutions including access, backhaul, CPEs and management solutions. Wavion is privately held and backed by Tel Aviv-based Investors Elron Electronic Industries Ltd. and BRM Capital. Wavion's headquarter is located in Yoqne'am, Israel, and the company has worldwide offices in Miami USA; Dallas USA; Sau Paulo, Brazil; Buenos Aires, Argentina; Lima, Peru; Bogotá, Colombia; Moscow, Russia; New Delhi, India; Beijing, China; Tokyo, Japan; Seoul, Korea and Singapore. Additional information about Wavion is available at www.wavionnetworks.com.

About SYSCOM

SYSCOM is a Mexican distributor with over 500 employees and seven warehouses, strategically located throughout Mexico in order to assist its dealers in the fastest possible way. SYSCOM's headquarter is located in Chihuahua, an important Mexican city two hundred miles south from the U.S border and very well communicated with the rest of the country and to the United States, by land and air. SYSCOM stocks more than 18,000 SKUs (stock keeping unit) and ships and delivers 99% of all of orders in less than 24 hours. [SYSCOM has certified its procedures under ISO 9000](#) 10 years ago and is audited biannually by Perry Johnson Registrars, USA. SYSCOM also requires ISO 9000 from all its represented vendors. SYSCOM also owns an American company located in El Paso, Texas, with branches in Miami, FL. and San Diego, CA, in order to cover the South American market,.. Additional information about SYSCOM is available at: <http://www.syscom.mx>

About ESTELM

Established in 2004, ESTELM is a system Integrator in Tlalnepantla de Baz, Estado de Mexico. ESTELM specializes in developing solutions for Telecom projects in National and International markets, with abilities to integrate the technology and services, tailored to the specific needs of the costumer. Additional information about ESTELM is available at: <http://estelm.com.mx/>
