

Wavion and ECNEX Partner to Provide High Speed Internet Access in Hotels Throughout Mexico

Yoqne'am, Israel, March 16, 2011 - Wavion™, a technology leader in metro and rural Wi-Fi with a new generation of Beamforming-based Wi-Fi base stations, and ECNEX, a leading provider of broadband technology solutions for the hospitality industry in Latin America, announce today the deployment of Wavion's Wi-Fi base stations for high speed internet access in major hotels in Mexico.

The deployment is based on Wavion's WBS-2400 base stations and includes a prestigious Hotel in Polanco, Mexico City (picture); the Holiday-Inn hotel in Leon Guanajuato; the Silver Sands and Capri Hotels in the Mayan Riviera; the Holiday-Inn Hotels in Pachuca, Queretaro and Cuernavaca, to name a few.

"We have selected Wavion's Wi-Fi solution due to its enhanced coverage and capacity," said Ernesto Romerc ECNEX's Founder and CEO. "We are very pleased with the outcome. Using Wavion we were able to cover all rooms, hallways and outdoor areas with only a few base stations. For example, in the Polanco Hotel, we used three WBS-2400 base stations to cover all 712 rooms and pool area. During peak time, each Wavion base station handles over one hundred concurrent users, providing an excellent user experience".

Wavion's unique and powerful WBS-2400 spatially adaptive Beamforming base stations provide extended coverage, higher throughput and superior indoor penetration.

Unlike conventional indoor Wi-Fi equipment, which requires an access point per every few rooms, Wavion's solution covers a hotel with few base stations from the outdoor, even in heavy foliage environments. This waives indoor drilling and wiring and furthermore, enables outdoor coverage as well as covering all rooms, making Wavion an excellent solution for hotels and resorts.

"Wavion is proud to partner with ECNEX in the hospitality market", said Daniel Dominguez, Wavion's Vice President Latin America. "We are pleased that our superior coverage, capacity and reliability have significantly contributed to ECNEX's success in providing high quality service to their customers. It is yet another proof of the added value of our unique and powerful Beamforming technology to the hospitality market."

About Wavion

Wavion Wireless Networks is a worldwide technology leader in outdoor Wi-Fi applications in metro and rural areas with deployments in more than 65 countries. The company's true digital Beamforming and Space Division multiple access (SDMA) technologies are the first and only to resolve the significant performance, penetration and profitability challenges facing large scale metro and rural deployments. Featuring Wavion Base Stations (WBS), in 2.4 GHz and 5 GHz unlicensed bands and in 700MHz licensed band, Wavion offers end-to-end solutions including access, backhaul, CPEs and management solutions. Wavion is privately held and backed by Tel Aviv-based Investors Elron Electronic Industries Ltd. and BRM Capital. Wavion's headquarter is located in Yoqne'am, Israel, and the company has worldwide offices in Miami Florida USA, Dallas Texas USA, Sao Paulo Brazil, Buenos Aires Argentina, Lima Peru, Bogotá Colombia, Moscow Russia, New Delhi India, Beijing China, Tokyo Japan, Seoul Korea and Singapore. Additional information about Wavion is available at www.wavionnetworks.com.

About ECNEX
